

Microsoft Visual Studio Team System Essentials Course

This two day course is designed to get your team up to speed with Visual Studio Team System 2008 as quickly as possible. The course focuses primarily on learning the efficient use of Work Item Tracking and Version Control but will also look at Team Build, Reporting and Collaboration.

The course introduces the various components that make up Microsoft Visual Studio Team System and briefly introduces each of the core technologies involved. You will learn how to create a Team Project and use Work Items to efficiently track and manage work. Tools used in this module include Microsoft Visual Studio, Microsoft Excel and Microsoft Project.

The second major focus of the course examines how to use the version control system to check-in/check-out, branch, merge, shelve and much more. It covers resolving merge conflicts and how to use treediff and annotate to find changes quickly and easily.

All modules in this course include hands-on labs to reinforce practical skills and ensure you're ready to use the tools on your return to your workplace.

Who Should Attend:

This event is designed for all teams members looking to effectively use the core features of Microsoft Visual Studio Team System and Team Foundation Server 2008. This includes developers, testers, analysts and project managers.

Course Objectives:

At the end of this course attendees will be able to create a new team project, create, modify and assign work items as well as create custom work item queries. Attendees will be able to use the version control system and do branching and merging in accordance with industry best practises.

At the completion of the course, attendees will be able to:

- Create Team Projects
- Manage work using Work Items
- Use the version control system
- Create automated builds
- Use multiple client interfaces
- Start using the built-in reports

Course Outline:

Module 1: Introducing Microsoft Visual Studio Team System

Module 2: Creating a Team Project

Module 3: Mastering Work Items

Module 4: Effective use of TFS Version Control

Module 5: Build Automation

Module 6: Using Team System Web Access

Module 7: A lap around the TFS reports

"Get your team working together effectively"
